Pixi White Labels

Pixi White labels are the heavyweights of the range, often used by plant breeders they are becoming popular in nurseries for marking rows or beds.

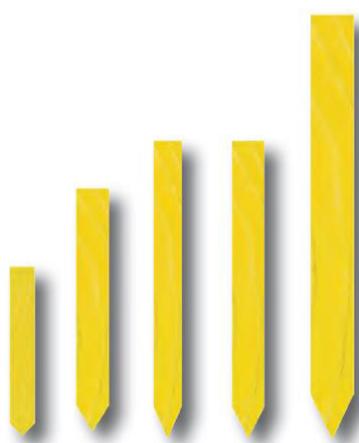

Pixi White labels are available in 2 sizes, 17 x 150mm and 30 x 300mm.

The larger size comes with a slot to accommodate a loop label.

An **Edding 8300** marker pen is recommended for long lasting labelling.

Pixi Laser

Pixi laser labels can be printed with any good quality laser printer.

Double sided printing is possible if your printer has this feature.

For long-lasting printing outdoors or anywhere exposed to strong sunlight please print only in black as this is the only pigment with long-term UV resistance of around 24 months.

Pixi laser labels are supplied in boxes of 100 sheets, 200 microns thickness for easy printing.

Pixi 26 can be folded longitudinally after printing for increased strength.

Loop labels

Loop labels are commonly used in Nurseries to identify individual plants and in Garden Centres for identification and pricing. We offer a wide range of sizes, colours, formats and materials well suited to their intended uses.

Loky Roll Labels

Loky labels are aimed at Nurseries who find it more convenient to write labels by hand as required rather than resorting to any sort of printer.

Available in PVC to write with a soft pencil or **Edding** marker pen and, for excellent resistance at low temperatures, in Vinyl which should be written with an **Edding** marker pen. **Loky** labels are available in up to 7 colours.

Curliss Labels

Curliss are our most extensive range of loop labels, available in a multitude of colours, sizes, formats and materials. Choose the material to suit your method of printing.

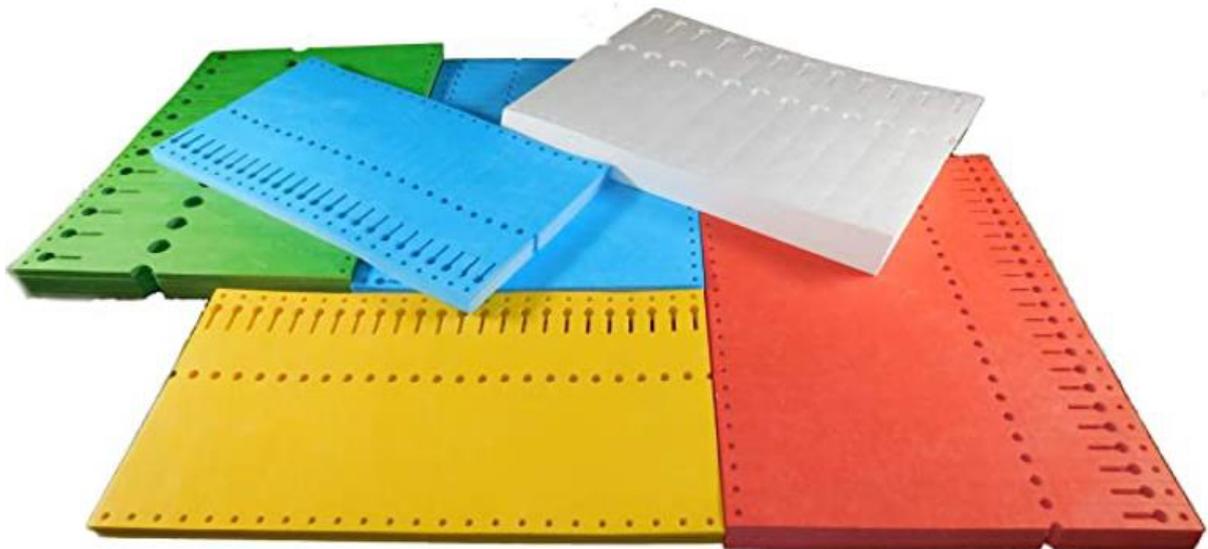

Curliss Tyvek

Tyvek is the preferred material when printing with a dot-matrix printer. Ink adheres well to the slightly porous texture of the surface. Tyvek is very strong and does not tear readily. Available in two weights, 75g/m² and 105g/m².

For long lasting labelling, especially outdoors the 105g/m² is to be preferred.

All our Tyvek labels are supplied in fanfold presentation.

Tyvek can also be handwritten with a pencil, ball-point pen or an **Edding** marker pen.

Curliss Tyvek labels have also found uses in other industries, for example:-

- in Workshops for labelling parts
- in Car Service and Sales departments for identifying keys
- in Agricultural Development
- in Garden Design and Landscaping

Curliss Laser

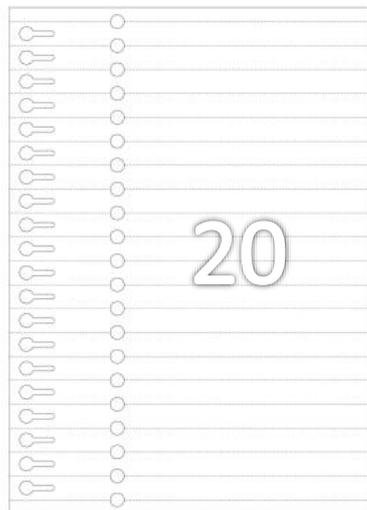

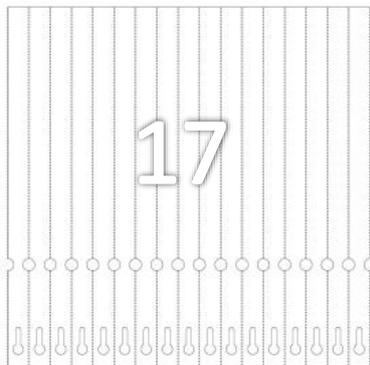

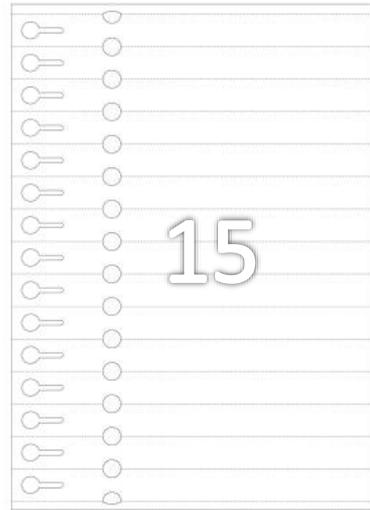

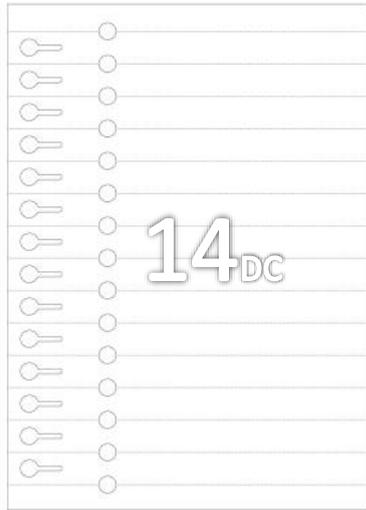

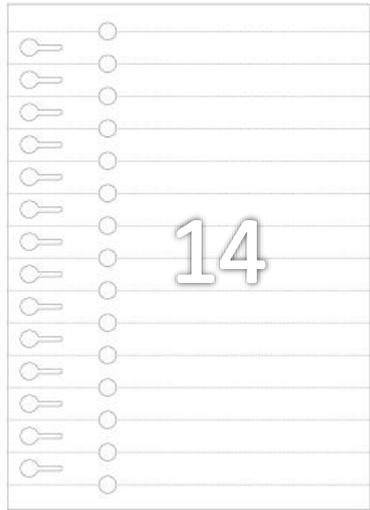

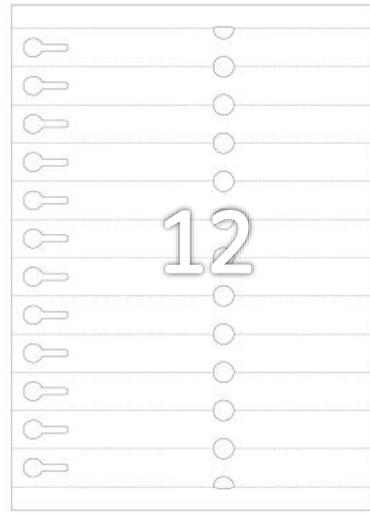

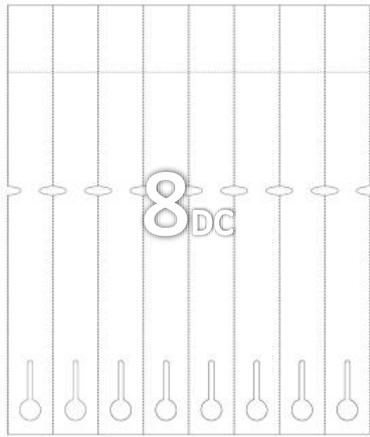

Laser printing is becoming ever more popular in the field of labelling, there are obvious practical advantages:-

- the black toner used in laser printers is carbon-based and resists fading for many years
- a laser printer can be found in most offices
- the quality of materials available; our polyester sheets are coated on both sides with 'LD' varnish for trouble free printing and durability
- the possibility of printing limited and varied series
- personalisation with logo, price, barcodes
- A4 sheets make for easier handling

Colour laser pigments will only last for around 5 to 10 months outdoors, so for labelling which needs to last, print in black.

Eleven different formats are available, some with detachable coupons.

Edding 8300 marker

The **Edding 8300 marker** is proven to be one of the few truly long-lasting pens for field use.

We have tried others but have found this to be the best.

The width of stroke is from 1.5 to 3mm.

Dense black pigment highly UV resistant and works well in dusty conditions.

Part No.	Description	Dimensions	Pack size	£
1570627	Edding 8300 marker	1.5 to 3mm stroke	10	43.45

Edding 400 marker

The **Edding 400 marker** has similar qualities to the **8300** but has a finer point making it ideal for writing on the smaller labels.
